

Healthful Chat Bot

@healthfulassistantbot

2

There is a problem...

solution!

Health assistant

as a bot in your messenger

Get free personalised health
information in an instant

No adverts ever.
Download for free

BIG CONCEPT

Use natural language processing and medical databases for 'better than Google' symptoms-based self-diagnosis

Say hello to your personal health assistant

- ❑ Simply speak or type what's wrong with you
- ❑ It understands and checks your symptoms
- ❑ It asks you specific questions to be more accurate
- ❑ You get relevant, personalised health information
- ❑ It's quick, accurate, easy and free!

What is the benefit of using it

Save time

Help to solve simple things without borrowing doctors time

Know solution

Bot know most popular and safe way to solve problem

Connected

Integrated with calendar, map, notes in user smartphone

The bot typifies a new approach to mobile health. It is intelligent, personalised and gets cleverer as it gleans data from its users

Who and when can use it

Everybody...

If you are more than 14 years old and may think yourself. Bot just helps you, always make solution yourself!

...when feel bad

Just type what do you feel, or ask general question to find an advice

How does it work?

Demo and backend

IT IS EASY

Give your users an engaging experience with bot by guiding them through a series of tasks in natural language - rather than a long form.

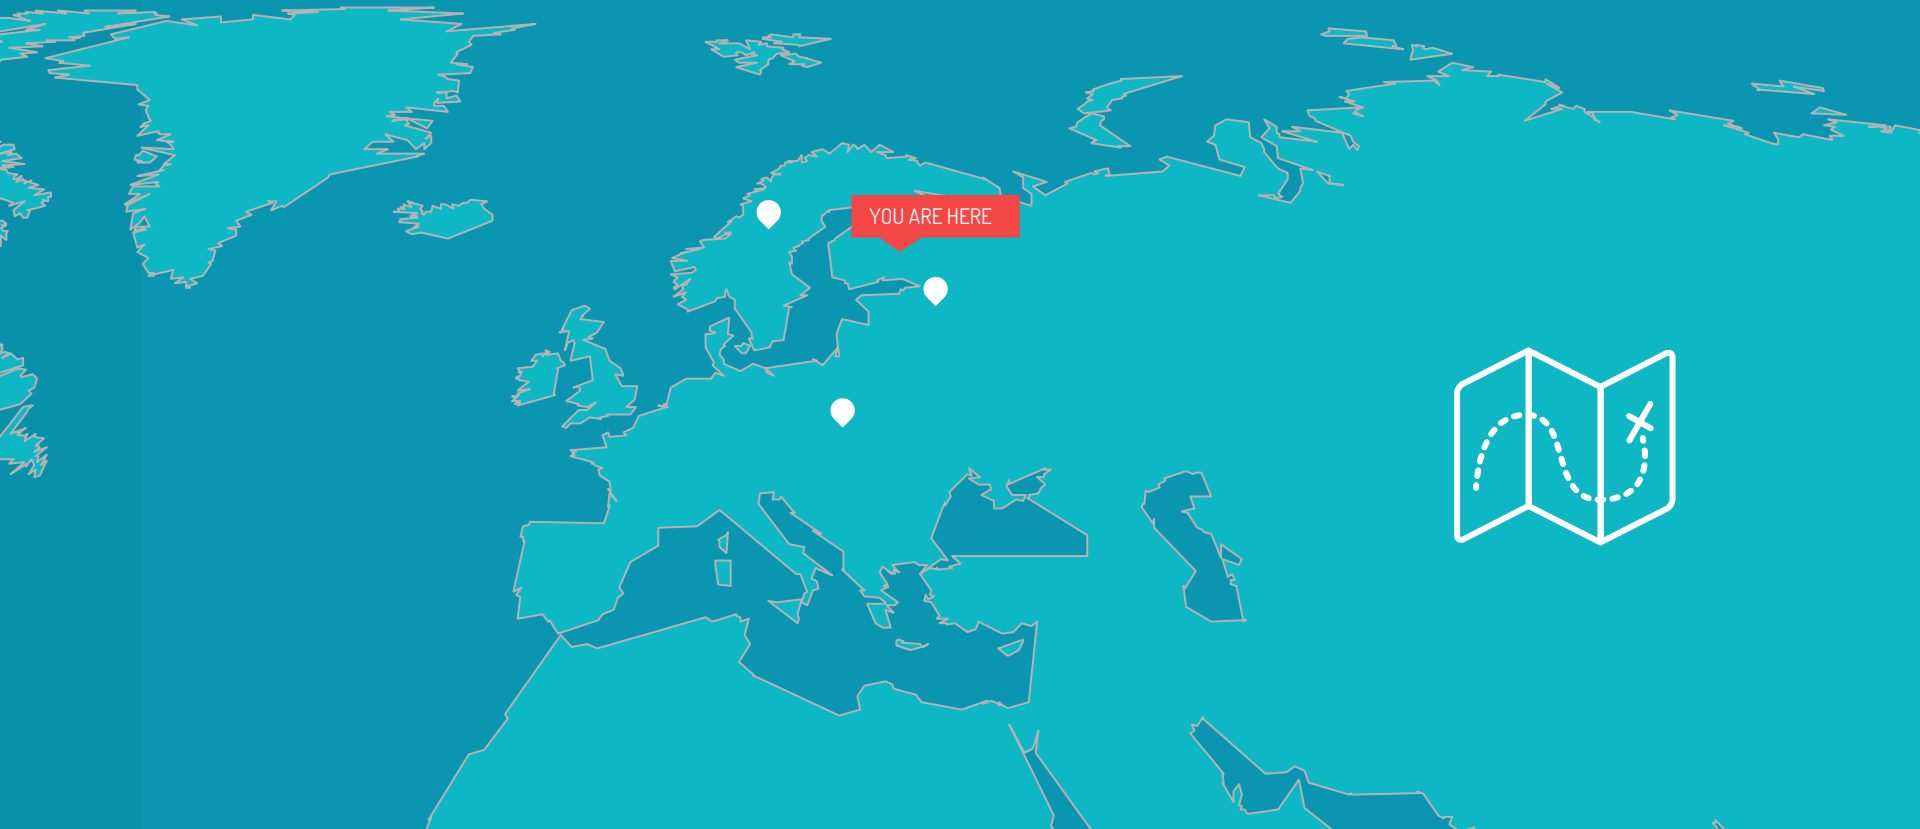

Dialog
Script conversations any way you like to answer questions, walk through processes, or just to chat!

Natural Language Classifier
Interpret and classify natural language with confidence.

Backend

Node.JS

The base

Telegram API

The messenger

Alchemy

Image processing

Coffee and RedBull

The source of energy

IBM Watson

The learning mind
Text processing

FURTHER DEVELOPMENT

- ❑ User profiles
- ❑ Reminders
- ❑ Voice recognition
- ❑ Any platform any device

THANKS!

Keep Coding Bad
